

BREWERIES

Shepard Bros. Inc.

Shepard Bros. is a leading provider of chemical products and engineering services, solving problems in a wide variety of markets.

Shepard Bros. Food and Beverage Division, with specialization in Brewery Services, provides environmentally responsible cleaning products and services for the Food and Beverage industry.

Shepard Bros. integrates superior products, custom engineered feed systems, and around-the-clock technical support to assure our customers of the most comprehensive and cost-effective cleaning and sanitation programs available.

At Shepard Bros. we understand that the quality of a product starts with its chemical components and ends with solid customer support.

The Best Program for Your Bottom Line

We work closely with your brewery sanitation team, brewers, engineers, quality control and support personnel to design and implement programs that meet your brewery's specific needs. Our customized programs give you improved efficiencies that boost productivity and increase the return on your cleaning and sanitation program investment.

The Service You Need – When You Need It

When you're running a brewery where effective, reliable cleaning and sanitation are major concerns, you can rest assured that technical service from the experts at Shepard Bros. is always available to you. If you discover a bacterial problem, and need our help immediately, we're always just a phone call away. No matter what time of the day or night, one or more of our technical experts can be there right away with troubleshooting, answers, and advice. Fulfilling your needs quickly and efficiently is our specialty.

And to help you avoid those emergencies, our technical service representatives routinely work with your brewery personnel to make sure our products and equipment are giving you the results you need. Additionally, we offer a full complement of training programs and in-depth seminars at our headquarters or on-site at your brewery. You can look to Shepard Bros. for ongoing support that's just as dependable as our products.

Controlling Costs

We'll work closely with you to develop programs that will meet your cleaning and sanitation needs while staying within your budget. You can rely on Shepard Bros. to deliver state-of-the-art cleaning and sanitation that you can afford.

To learn more, we invite you to contact a Shepard Bros.' Brewery Specialist at **(800) 645-3594**.

Proven Product Performance

We manufacture and distribute a full line of high performance cleaners, degreasers, sanitizers, and lubricants for the Food and Beverage Industry. Each product is manufactured to meet the most stringent industry requirements, and each is monitored for quality control from receipt of raw materials through production to final inspection. Here are a few of our many products for breweries:

CIP/COP Cleaners

- **Acid #14** – Circulating Acid Cleaner for CIP operations and passivation of brewery equipment and tanks.
- **Shear 250** – Heavy Duty Liquid Alkaline Cleaner for circulation, soak, and spray-cleaning of brewery equipment.
- **APC 500** – Heavy Duty Powdered Alkaline Cleaner for circulation, soak, and spray-cleaning of brewery equipment.
- **Complete 700** – Heavy Duty Powdered Alkaline Chlorinated Cleaner for use in place of APC-500 when a chlorinated powder is needed.

General Purpose Cleaners

- **Dissolve 101** – Foaming Liquid Cleaner/Degreaser is ideal for cleaning walls and floors.
- **Shur** – Powdered General Cleaner is a non-chlorinated product ideal for parts, gaskets, and tank exteriors.

- **DS-350** – Powdered General Purpose Chlorinated Cleaner is used for manual cleaning operations.
- **SB-Brewery Cleaner** - Multi-purpose Powdered Alkaline Cleaner is used for keg washing as well as for brewhouse and all other tanks.

Sanitizers

- **SB-Peracetic Acid** – Peracetic Acid Sanitizer for food contact surfaces.
- **Acidize NF 20** – Low Foam Acid Sanitizer for food contact surfaces.
- **SB Chlorinate II** – 12.5% Chlorine Sanitizer for food contact surfaces.
- **Sano Rinse** – Quaternary Ammonium Sanitizer for food contact surfaces. Especially useful in controlling mold.
- **SB LFI** – Low Foam Iodine Sanitizer for food contact surfaces.
- **Oxine FP** – Stabilized Chlorine Dioxide Sanitizer for hard surface sanitizing in bottle rinsing and brite beer tanks and for odor control in pits.

Conveyor Lubricants

- **Propel ST** – New “dry lube” technology representing a radical advance over traditional water based lubricants. Waterless system; water is **NOT** used. High performance synthetic conveyor and chain lubricant with excellent long term filming characteristics and superior lubricity allows use at extremely low concentrations.
