## Surfactant Additives and Formulated Cleaners

### Shepard Bros. Inc.

#### ABOUT SHEPARD BROS.

Shepard Bros. is a leading provider of chemical products and engineering services, solving problems in a wide variety of markets.

#### SHEPARD BROS. FOOD AND BEVERAGE DIVISION

We specialize in environmentally responsible cleaning products and services for the Food and Beverage Industry.

#### SHEPARD BROS. SERVICE

We integrate superior products, custom engineered feed systems, and around-the-clock technical support to assure our customers of the most comprehensive and cost-effective cleaning and sanitation programs available.

#### SHEPARD BROS. QUALITY

We are committed to quality that starts with our chemical manufacturing and ends with solid customer support.

### Delivering Greater Cleaning Power

The Domolish product line consists of unique surfactant cleaning additives and formulated caustic cleaners designed to deliver greater cleaning power in alkaline CIP/COP cleaning operations in food and beverage plants.

### Effective on the Most Difficult Soils

The Domolish products have been specifically developed to remove baked-on, hard-to-remove, food soils and deposits. The surfactants used in these products deliver outstanding penetrating, wetting and detergent power to quickly and easily remove even the toughest soils with minimum effort.

### Creating a Sustainable Future

The Domolish products deliver superior cleaning performance with lower caustic levels and shorter cleaning cycle times. This enables real reductions in water, energy and chemical usage with reduced effluent flows. Not only does this add up to real cost savings, but just as important, it also contributes to a more sustainable future.

### Domolish Program Benefits

#### More Effective Cleaning

- For Evaporator CIP Cleaning: Quickly unplugs even the dirtiest tubes.
- In Dryers: Effectively cleans those tough-to-clean, hard-to-reach areas.
- For HTST cleaning, as well as general cleaning of a variety of process equipment: Provides effective cleaning at lower caustic levels.
- Ideal for removing burnt-on soils in baking and cooked food applications.
- Particularly effective in removing sugars and proteinaceous soils.

#### Reduced Cleaning Cycle Time

- Compared to conventional caustic cleaners, the Domolish products significantly reduce cleaning times.

#### Reduced Water and Effluent

- The effective cleaning power of the Domolish products results in significant water and effluent reductions.

#### Easy to Use

- Easily dilutable and fully stable in water and concentrated alkaline cleaning solutions.
- Simple to apply, rinses quickly and easily.

#### Domolish High Foaming, Penetrating Surfactant Additives:

- **Domolish** – Added to concentrated alkaline cleaning solutions, such as sodium or potassium hydroxide, **DOMOLISH** quickly cleans even the dirtiest surfaces with a minimum of effort.
- **Domolish K** – This potassium based version of **DOMOLISH** minimizes the sodium ion content that can create effluent discharge problems in some systems.
- **Domolish HR** – This high retention version of **DOMOLISH** is ideal for foam cleaning applications where its thickening and vertical cling properties ensure extended cleaner contact time and thorough soil removal.

#### Domolish Low Foaming, Penetrating Surfactant Additives:

- **Domolish LF** – This low foam version of **DOMOLISH** is specifically designed as a surfactant cleaning additive where a low foam profile is critical.

#### Domolish Penetrating Alkaline Cleaners:

- **Domolish RT-8** – This high foaming concentrated alkaline cleaning compound offers superior wetting, penetrating and detergent properties; quickly removing even the toughest baked on soils.
- **Domolish NF-16** – This low foaming concentrated alkaline cleaning compound provides superior cleaning power wherever a low foam cleaner is required.

#### Industry Applications:

The **Domolish** products are used wherever alkaline cleaning is required and are widely used in:

- Meat Processing Plants
- Dairies
- Bakeries
- Breweries
- Wineries
- Prepared Cooked Food Plants
